

I'm a fullstack developer who turns design ideas into pixel-perfect and responsive websites that wow users.

## Work Experience

---

### Front-end Developer

- Built end-to-end web solutions, from intuitive user interfaces to robust server-side architectures enabling faster feature delivery and improving operational efficiency by 30%.

### video editor

- Edited and assembled raw footage into engaging, high-quality video content while maintaining visual consistency and storytelling best practices.
- Designed motion graphics, animated titles, and visual effects in Adobe After Effects to enhance viewer engagement and brand identity.
- Optimized video pacing, color grading, audio synchronization, and transitions, resulting in polished content suitable for social media, marketing campaigns, and digital platforms.

### ui/ux designer

- Designed intuitive and visually appealing user interfaces based on user needs, business goals, and modern design principles.
- Created wireframes, high-fidelity mockups, and interactive prototypes in Figma to validate user flows and improve usability.
- Established consistent design systems, typography, and component libraries to ensure a cohesive user experience across all screens.

## Education and Certifications

---

- computer science estin
